

powder insecticides/herbicides

Since 1927, Arrow-Magnolia has helped people solve their cleaning and maintenance problems with the finest products available today.

ARROW-MAGNOLIA
International, Inc.

HIGHLIGHTS

- Kills by dehydration not poisons, won't kill grass
- Transfers from bug to bug, taken to queen
- Non-conductive
- Pleasant Fragrance, lasts up to 6 months
- Powered by extracts from the Chrysanthemum Flower
- Active Ingredients: Pyrethrins 1%
Piperonyl Butoxide, 10%
Technical Silicon Dioxide 60%
- EPA REG NO. 1839-94-82439
EPA EST NO. 82439-TX-1

TYPICAL PROPERTIES

- Vapor Pressure: **N/A**
- Volatility: **N/A**
- Solubility: **Dispersible**
- Specific Gravity: **0.13**
- Vapor Density: **N/A**
- pH: **6.6**
- Evaporation Rate: **N/A**
- Physical Description:
**Off white powder w/a
plant extract odor**

SAFETY CAUTIONS

- Keep out of reach of children.
- Do not contaminate other pesticides, fertilizers, water, food or feed by storage or disposal.
- Store in cool, dry, well-ventilated place.
- Keep away from heat, ignition sources and strong oxidizers.
- Store containers upright and closed.
- Refer to MSDS for additional safety information.

HMIS RATINGS

ANTICIDE

Powder

DESCRIPTION:

This product contains the quick killing botanical insecticide, pyrethrum, an extract of the chrysanthemum flower, which provides effective control of insects upon direct contact with an added benefit of flushing these insects to aid in a more complete kill. The silicon dioxide, in this product, provides long term control through a desiccating (drying) action. Put the powder down and insects walking on it will continue to die for up to 6 months.

DIRECTIONS:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FIRE ANTS: Sprinkle 2 tablespoons over fire ant mounds greater than one foot in diameter. For best results, apply when ants are active and avoid treatments in heavy dew or before rainfall. Do not disturb ants while applying this product. Do not water after application. Depending on the size of the mound, it may take up to one week to kill the fire ants. Therefore, wait seven days before reapplying this product. Repeat application only if ants reappear. It should not be used as a barrier treatment or as a prophylactic measure. Treat new mounds as they appear.

BEEES, HORNETS, YELLOW JACKETS AND WASPS: It is generally advisable to treat nests in the evening when insects are less active and have returned to the nest. Using hand or power duster or other suitable means, with extension tubes, if necessary, thoroughly dust nest and entrance and surrounding areas where insects alight. Nests in wall voids can be located by placing your ear against the wall. To treat, drill a hole in the area. For best results, check nests carefully one or two days after treatment to ensure complete kill. Then remove and destroy nest to prevent emergence of newly hatched insects. If removal is not feasible retreat the nest if necessary. Do not use this product to treat overhead nests. Repeat as necessary.
