BUG OFF PRO WIPES

WIPES

DESCRIPTION:

BUG OFF PRO WIPES provide protection against mosquitoes, gnats and other insects using all-natural ingredients such as Citronella Oil and Peppermint Oil. On windy days, liquid or aerosol insect repellents can be wasted (blown away by windy conditions) and hard to transport for all outdoor activities. BUG OFF PRO WIPES give you better control and makes it easier to apply the repellent in a convenient and portable packet.

DIRECTIONS:

Peel open the flap and remove a towelette, reseal to prevent evaporation. Wipe towelette on exposed skin areas. For best results, reapply after swimming, heavy perspiration or washing. BUG OFF PRO WIPES are intended for use on bare skin and should not be applied to the face and head areas in a way that would come into direct contact with the eyes. Use on exposed skin to protect against mosquito bites that can carry dangerous diseases.
