

aerosol deodorants/disinfectants

Since 1927, Arrow-Magnolia has helped people solve their cleaning and maintenance problems with some of the finest products available today.

CHEM AQUA

HIGHLIGHTS

- Convenient Aerosol Application
- Excellent Foaming Action for Cleaning
- Combination Disinfectant, Deodorizer and Cleaner
- Virucidal, Fungicide, Mildewstat, kills HIV 1, MRSA, Staph
- EPA Registered, Quat-based
- 20 ounce can

TYPICAL PROPERTIES

- Vapor Pressure: **N/E**
- Boiling Point: **> 212°F**
- Solubility: **Complete**
- Specific Gravity: **1.00**
- Vapor Density: **N/E**
- pH: **12-13**
- Evaporation Rate: **N/E**
- Physical Description: **Slightly cloudy, colorless spray/mist w/clean fragrance**

SAFETY CAUTIONS

- Store out of reach of children.
- Exposure to temperatures above 120 F may cause bursting.
- Do not use or store near heat, sparks or open flame.
- Do not puncture or incinerate container.
- Store in a cool, dry place.
- Do not get in eyes, on skin or on clothing.
- Refer to MSDS for additional safety information.

HMIS RATINGS

AEROSOL

DESCRIPTION:

CHEM AQUA is designed for cleaning, deodorizing and disinfecting for hospitals, nursing homes, schools, hotels, homes and food processing establishments. This product is effective where housekeeping is of prime importance in controlling cross-contamination from treated surfaces. CHEM AQUA, when used as directed, is formulated to disinfect inanimate, hard, non-porous surfaces: walls, floors, sink tops, toilet bowls, toilet seats, chairs, tables, telephones, restrooms, shower stalls, bathtubs, hampers and cabinets. CHEM AQUA is not for use on medical device surfaces. It deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, toilet bowls and other areas which are prone to odors caused by microorganisms.

CHEM AQUA kills HIV-1 on pre-cleaned environmental surfaces or objects previously soiled with blood or body fluids in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces or objects with blood or body fluids, and in which the surfaces or objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of HIV-1.

DIRECTIONS:

DISINFECTION, DEODORIZATION AND CLEANING: Shake can before using. Hold container six to eight inches from surface to be treated. Spray area until it is covered with white foam. Allow foam to penetrate and remain wet for 10 minutes. No scrubbing is necessary. Wipe off with a clean cloth, mop or sponge. For heavily soiled areas, a pre-cleaning step is required before treatment. When used in food processing establishments, cover or remove all food and packaging materials, remove all gross soils, saturate all surfaces with the spray product, scrub to loosen soils, allow soaking for 10 minutes, thoroughly rinsing all wetted and cleaned surfaces with potable water.

MILDEW STAT: To control mold and mildew on pre-cleaned, hard, non-porous surfaces spray surface to be treated making sure to wet completely. Let air dry. Repeat application at weekly intervals or when mildew growth appears.
