

# powder deodorants/disinfectants

Since 1927, Arrow-Magnolia has helped people solve their cleaning and maintenance problems with the finest products available today.

## HIGHLIGHTS

- Deodorizing Powdered Granules
- Strong Absorbent Action
- Soak up and trap malodors
- Slow evaporation of perfumes
- Concentrated perfumes have strong masking action

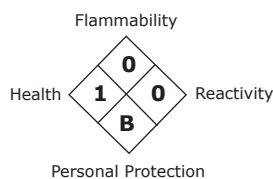

## TYPICAL PROPERTIES

- Vapor Pressure: **Unknown**
- Volatility: **N/A**
- Solubility: **YES**
- Specific Gravity: **N/A**
- Vapor Density: **N/A**
- pH: **N/A**
- Evaporation Rate: **Slower than Ether**
- Physical Description: **White powder w/no odor**

## SAFETY CAUTIONS

- Store out of reach of children
- Keep container closed and properly labeled when not in use
- Store indoors, in a cool, dry, well-ventilated place
- Refer to MSDS for additional safety information.

## HMIS RATINGS

# DEO GRAN

## DESCRIPTION:

DEO GRAN powder is composed of absorbents and a unique blend of aromatic deodorants and masking agents. It can be used to control odors in refuse cans, trash heaps, disposal trucks, storage bins, loading docks or any other large area, etc. Other recommended areas of use are in restaurants, schools, motels, hotels, churches, funeral homes, factories, meat packing plants, hospitals and most other institutions.

## DIRECTIONS:

Offensive odors are easily and economically reduced by sprinkling these granules sparingly where the odors occur. The deodorizing action works in two ways - by the strong masking action of the concentrated aromatic perfumes, and by the absorbent qualities of the granules, which soak up and "trap" malodor-causing liquids. The absorbency also helps to clean the treated refuse areas. Slow evaporation of the active perfumes allows for long-lasting control.
